

Yefimov V.V. Features of operational-search prevention of economic crimes in the agricultural industry complex of Ukraine. The modern problems and peculiarities of operational-search prevention of economic crimes in the agro-industrial complex of Ukraine are considered. It is emphasized that in order to construct a modern model of operational-search prevention of economic crimes in the agro-industrial complex of Ukraine, it is necessary to solve a number of problems: - to reveal the essence of the criminalization of economic relations in the agrarian sector; - to identify features of the functioning of the agrarian sector in modern socio-economic relations and to identify the main factors of its criminalization; - to identify the main types of economic crimes in this area; - to determine, on the basis of evaluation of the current state of economic crime in the agroindustrial complex: the nature, trends and dynamics of its development; - to conduct a comparative analysis of economic crime in the investigated sphere in different regions of Ukraine; - to consider the modern mechanism of combating economic crime in the AIC and to highlight its shortcomings; - to form organizational and economic measures to combat economic crime in the agroindustrial complex; - to propose approaches to improve the activities of the bodies and units of the National Police in the system of combating economic crime in the AIC of Ukraine.

Keywords: *operational-search prevention, signs of crimes in the field of agrarian and industrial complex of Ukraine; criminal acts; signs of concealing criminal acts; characteristic of the abduction model; typical signs of kidnapping; features of versioning.*
