

SUMMARY

Krasnobryzhy I.V., Prokopov S. O. Some aspects of use in educational process of trainings with elements of quest technologies. The authors have attempted to harmoniously combine intensive trainings, elements of quest technology and the latest software and training for audio and video telecommunication search for the most optimal algorithm for criminal analysis by National Police officers, which should improve the effectiveness of combating criminal acts.

The question of analysis of modern interactive teaching methods has been researched. The information business game "Line 102" was developed and implemented in the educational process of Dnipropetrovsk State University of Internal Affairs. The structure of the training information and technical platform of complex operational-tactical exercises of the students, consisting of seven training places, operator of call-center, Situation Center Manager, attendant of department of police, Police Response Team, Investigator, Operational Officer and Criminal Officer, has been proposed. The multimedia capabilities of the platform for conducting trainings with application of the so-called quest-technology have been considered. The wider use of the informational and technical platform operating in the Dnipropetrovsk State University of Internal Affairs has been provided, accompanied by trainings using quest-technologies by other educational institutions of the Ministry of Internal Affairs for the development of the necessary practical skills among the staff of the National Police of Ukraine in order to improve the quality of their performance of their official duties.

In the course of training, cadets learn a set of practical activities of police officers, acquire and improve the following skills: processing of primary information on criminal and other offenses; procedure for registering such information; work as part of the outfit of the patrol service, the investigation team; preparation of registration and procedural documents; use of technical means of information obtaining; assessment of offenses; procedural procedure for conducting investigative (search) actions, tactical actions of police officers; analysis of the information received, interaction between employees of different divisions, display of ingenuity, initiative and independence.
