

SUMMARY

Leonenko T. E., Sokur T. A. Public danger of intentional introduction into circulation on the market of Ukraine (emission into the market of Ukraine) of dangerous products. An attempt was made to determine the public danger of deliberately putting into circulation on the Ukrainian market (release to the market of Ukraine) dangerous products on the basis of the analysis of scientific views, theoretical provisions and legislation on this problem.

The purpose of the article is to solve the problematic issues of determining the public danger of deliberately putting into circulation on the Ukrainian market (release to the Ukrainian market) dangerous products.

The nature of the public danger of a crime must be formulated precisely depending on the definition of the object, object and socially dangerous act (action or omission) of the crime. Therefore, we consider that the nature of the public danger of a crime, provided for by Article 227 of the Criminal Code of Ukraine, is in violation of the established procedure for carrying out business activities, in the part of the prohibition of entry into circulation on the Ukrainian market (release on the Ukrainian market) of products that do not correspond security requirements.

The degree of public danger of a crime always consists in causing damage to the object of criminal protection or creating a real threat of causing it, even in crimes in which socially dangerous consequences are not a necessary feature of the objective side of the crime (crimes with so-called formal composition), to which the crime provided by Article 227 of the Criminal Code of Ukraine belongs.

A crime under Article 227 of the Criminal Code of Ukraine directly (directly) causes damage or creates a real threat of causing it to a large scale, that is, in excess of 500 non-taxable minimum incomes.

By examining the nature and degree of public danger of the crime, provided for by Article 227 of the Criminal Code of Ukraine, it was established that it is in violation of the procedure for carrying out economic activity, established by regulatory legal acts, in the part of the prohibition of putting into circulation on the market of Ukraine (release to the Ukrainian market) products, which does not meet the requirements for its safety, which directly (directly) causes damage or creates a real threat of causing it, in large amounts, that is, in excess of 500 non-taxable minimum income.

Keywords: *public danger, nature of public danger, degree of public danger, dangerous products, putting into circulation, circulation on the market.*
