

Brusakova O. V. Administrative legal status of aviation personnel in Ukraine. In the article it has been emphasized the importance of defining the concept, nature, structure of the administrative and legal status of aviation personnel in Ukraine and the legal bases for its implementation. The author has defined the concepts of “administrative and legal status of aviation personnel” and “legal principles of realization of administrative and legal status by aviation personnel”. The essence of the administrative and legal status of aviation personnel has been defined as a set of rights and duties, as well as guarantees of their realization, which have been objectified in the rules of administrative law and recognized by persons who, within the aviation legal relationships, perform flight operations, aircraft maintenance, organization of air traffic, technical operation of terrestrial communications, navigation, surveillance. The legal basis for the implementation of the administrative and legal status of aviation personnel should be understood as a set of legal acts, at the level of which the set of rights and obligations of aviation personnel, as well as guarantees for their implementation, are enshrined. It has been analyzed the normative-legal acts, at the level of which the legal bases of realization of administrative-legal status by aviation personnel in Ukraine are fixed, taking into account their legal force.

At the same time, the largest number of cited legal acts is concentrated on the by-law level of legal regulation. Compared to other levels of legal regulation, the by-law level allows to regulate the relevant social relations as quickly as possible. However, a large number of such acts, including those issued by different constituent entities, make their perception and enforcement in general very difficult, and therefore, in author’s opinion, needs to be revised, which can be done through systematization of legislation.

Keywords: aviation staff, administrative and legal status, legal framework, legal regulation, normative and legal regulation.
